Intentions Note (Design)

- First : I opted for a cool design as simple as the business could be.
- Second : After choosing a Car retailer kind of business, I worked on the cards to be at least showing an effort i made in the research of a placeholder and how to manipulate a complex design.
- Conclusion >> It was a piece of work to design but structuring HTML with comments was a piece of cake.
- Report >> I didn't expect to come up with a Responsive Design in a glimpse of an eye
